# Executive Summary

**The second edition of ENERGY EXPO®, held between May 22 and 24, 2025, at Laminor Arena in Bucharest, Romania, proved once again that ENERGY EXPO® is more than just an exhibition fair.** It is a platform that unites industry leaders, government officials, innovators, and consumers. It is a hub for fresh ideas, powerful connections, and real solutions. A launchpad for start-ups, a stage for groundbreaking prototypes, and a space for voices to be heard.

**This year, ENERGY EXPO® went above and beyond, offering a bigger, better, and more powerful edition than in 2024. It exceeded expectations, as well as our own targets, further consolidating its status as the leading energy event in S-E Europe.**

## Key Highlights

**Global Participation** — ENERGY EXPO® 2025 attracted more than 280 exhibitors, special guests and partners from over 30 countries across four continents, a 65% increase compared to the 2024 edition.

**Attendance** — At the same time, the number of unique visitors recorded during the second edition increased by 30%, reaching over 9.150 attendees. Among the visitors, delegations from 14 countries and 5 Romanian municipalities have been present.

**Conferences & Workshops** — 14 conferences and workshops have been held during ENERGY EXPO® 2025, featuring more than 83 industry experts, with discussions tailored to all major sectors — B2B, B2C, and B2G.

**Energy Meets Innovation** — Together with Techcelerator, ROTSA, Ascendis, and in strategic partnership with PPC Romania and the Romanian and Moldovan Ministries of Energy, this year ENERGY EXPO® launched the first CleanTech Hackathon in S-E Europe. During the event 130 participants, mentored by 17 energy experts, developed in just 48 hours, 30 innovative solutions to real-world challenges.

**Energy Meets Education** — During this edition, ENERGY EXPO® also launched LOOP Academy, a pilot platform designed to unite and help generations X, Y, and Z to create a better future. For its first project, over 370 middle school students and 20 teachers from 15 schools in Bucharest accepted the #LOOPChallenge, and reimagined Brâncuși's Endless Column using only recycled materials.

**Energy Meets Community** — In addition to the Endless Columns created by students, ENERGY EXPO®, with support from Yellow Tree, ParkLake, Destiny Park, EDENLAND Park, PPC Romania, Nu Mai Port, and Cubic Center, collected over 18.200 plush toys to build the largest reinterpretation of Brâncuși's Endless Column. Toys which, on the 1st of June (International Children's Day), have been donated with the help of Taxiul cu Bomboane to less fortunate children.

**Awards & Prizes** — Through the CleanTech Hackathon, #LOOPChallenge, and Treasure Hunt, this year ENERGY EXPO® awarded prizes totaling over €50.000, highlighting its commitment to innovation, education, and community engagement.

# I. Introduction

**ENERGY EXPO® started with a simple but ambitious goal — to create a real, working platform for the energy sector in Romania.** We realized that to achieve this, we would have to bring together companies, start-ups, government officials, non-profit organizations, municipalities, research centers, experts, consumers, and communities from both traditional and clean energy sectors — all under one roof. Something that has never been done before. The first edition tested the waters. The second one confirmed the need, and **today, ENERGY EXPO® stands as one of the most dynamic industry events in Europe, with hundreds of exhibitors, thousands of visitors, and a growing international network.**

As the event continues to grow, so does the importance of well-established partnerships to make the experience easier and better for all parties involved.

With the largest global flight network and direct routes to Bucharest, this year, **Turkish Airlines, the official airline of ENERGY EXPO®,** played a key role in helping exhibitors, delegations, and guests from across continents attend the event. On the ground, **DB Schenker, the official freight partner,** ensured smooth, reliable, and cost-efficient logistics, handling every shipment with care.

**The CONNECT VIP Lounge, powered by JW Marriott Bucharest Grand Hotel,** was a highlight of ENERGY EXPO® 2025, offering not just exceptional cuisine and hospitality, but a refined setting for quiet moments away from the energy of the main floor. **Montana and Bradul Măneciu** gave life to the space with furniture that perfectly balanced comfort and style, creating an inviting atmosphere for conversations.

For the second year in a row, **Bilbor** kept everyone at ENERGY EXPO® well hydrated, making sure long days on the floor never ran dry. Meanwhile, **Dropshot** retained energy levels high with great coffee, fueling conversations, pitches, and meetings from mornings to late afternoons.

**Casa Magazin and Autocritica** played an essential role in bringing the nZEB Show and the EV Show to life, showcasing what is next in sustainable buildings and electric mobility. Throughout it all, **Antena 3 CNN** helped translate the event's momentum into national visibility. With extensive coverage, live broadcasts, and in-depth reporting, the partnership brought ENERGY EXPO® into headlines across Romania — amplifying the voices, innovations, and ideas that shaped this year's edition.

**None of this would have been possible without the exhibitors, affiliates, sponsors, and the entire network of partners who helped bring this edition to life. We thank every single person who was part of this journey** — from early planning to final execution — as the success of ENERGY EXPO® 2025 is the direct result of their trust, collaboration, and shared commitment to building something that truly moves the energy industry forward. **This edition proved this platform has momentum, but more importantly, a clear direction.** The chapters that follow tell the full story of what happened this year, at the same time, marking the beginning of what comes next.

## II. Participation Overview

### Attendance & Audience Composition

**ENERGY EXPO® 2025 recorded a total of 9.174 unique visitors — a 30% increase compared to the previous edition.** This growth highlights the event's rising visibility and importance within the regional and international energy space. Similar to the first edition, the audience covered the entire spectrum of the energy value chain, which created an ideal environment for open dialogue and knowledge exchange.

In terms of audience composition, this year, **59% of attendees came from the business-to-business (B2B) sector, out of which, 12% held C-level positions,** reflecting strong engagement from senior leadership and key decision-makers. The business-to-government (B2G) segment accounted for 2% of total attendance, bringing together representatives from public institutions, regulatory bodies, and policy organizations. Their participation added weight to discussions around regulation, funding, and national energy strategies. Finally, the remaining 37% were business-to-consumer (B2C) visitors, a mix of professionals, students, and individuals with a strong interest in sustainability and energy.

## Exhibitors & Industry Breakdown

**282 exhibitors, special guests, and partners representing a wide range of energy sub-sectors have been present at ENERGY EXPO® 2025, marking a 65% increase compared to the first edition.** International exhibitors made up 39% of the total — a significant jump from just 12% present in 2024 — with Turkey, Poland, and China leading the way.

**In terms of industries, the breakdown mirrored current industry trends and strategic priorities.** Solar energy dominated, accounting for 33% of participants, followed by Engineering, Procurement, Construction & Management (EPC/EPCM) at 26%. Smart Grid Technology represented 7%, Energy Storage Solutions 6%, and Sustainable Development Solutions another 6%. The remaining 22% covered a broad spectrum of sub-industries, including nearly Zero-Energy Buildings (nZEB), electric mobility, AI technologies, and much more. This diverse lineup highlighted the event's commitment to innovation, integration, and delivering practical solutions across the entire energy ecosystem.

## Global Presence

**In 2025, ENERGY EXPO® brought together representatives, delegations, and exhibitors from 33 countries across four continents, setting a new standard for international participation in Romania's energy sector.**

**Countries represented included** Turkey, Poland, Austria, China, Moldova, Greece, Norway, the Netherlands, Italy, Bulgaria, France, Denmark, North Macedonia, Switzerland, Sweden, Serbia, Germany, Belgium, Spain, Finland, the United Kingdom, Portugal, India, Malaysia, Vietnam, Croatia, Nigeria, the Czech Republic, Israel, Hungary, Ukraine, Egypt, and the United States of America. For many of these countries, participation offered direct access to the Romanian and regional energy markets, visibility among key industry stakeholders, and the opportunity to connect with local partners and projects.

**Fourteen embassies were officially present at this year's edition**, including delegations from Austria, Turkey, Finland, Greece, Moldova, India, Israel, Malaysia, Portugal, North Macedonia, the Netherlands, Croatia, Germany, and Denmark. Their involvement strengthened diplomatic ties and opened up new channels for bilateral dialogue in the fields of energy innovation, investment, and sustainability.

**Local authorities were also well represented.** The City Halls of Bucharest, Călărași, Hunedoara, Râmnicu Vâlcea, and Tulcea attended the event, underlining the growing role of local governments in implementing clean energy and smart city solutions. Their participation reflected a shared interest in finding practical, scalable approaches to accelerate the energy transition at local level.

### III. Special Projects

Since its first edition, ENERGY EXPO® has been committed to redefining what an energy exhibition can be — by introducing initiatives and projects rarely seen at traditional trade fairs. In 2024, that vision came to life through the Treasure Hunt, the Scientific Research Zone, and the Start-up Area, each designed to expand participation and spark curiosity.

In 2025, ENERGY EXPO® took things even further — placing more emphasis on education, community engagement, and innovation. This year's special projects included the **CleanTech Hackathon** — a space where emerging technology could connect with real-life challenges, the first of its kind in S-E Europe; **the expanded Scientific Research Zone** — highlighting Romania's leading R&D institutions; **the #LOOPChallenge** — a competition that empowered middle school students across Bucharest to explore circular economy in an interactive way; **the Plush Endless Column** — a CSR initiative that mobilized the community to donate plush toys to less fortunate children; and **the return of the Treasure Hunt** — a unique experience designed to boost exhibitor visibility, this time with even higher stakes and more incredible prizes.

Each of these initiatives pushed the boundaries of what an energy event can achieve, and together, these programs brought fresh perspectives, inspired dialogue, and created genuine collaboration between industry, academia, government, and the public. Their impact was tangible — seen in increased foot traffic, amplified media coverage, and meaningful results, proving that transformation happens at the intersection of innovation, education, and community. Looking ahead, ENERGY EXPO® is committed to scaling this strategic direction. By incorporating mission-driven initiatives into future editions, the event will continue to bridge the gap between industry and education, youth and opportunity, and technology and social impact — delivering value that extends well beyond the exhibition floor.

## CleanTech Hackathon

**Together with Techcelerator — Romania's longest-standing high-tech accelerator — ROTSA, Ascendis, and in strategic partnership with PPC Romania and the Romanian and Moldovan Ministries of Energy, this year ENERGY EXPO® launched the first CleanTech Hackathon in S-E Europe.** Held on May 23–24, the competition brought together start-ups, scale-ups, and innovators focused on developing AI-powered solutions for the green energy sector.

**The hackathon was part of the CleanTech Nexus program** — launched in June 2024 by Techcelerator and the Ministry of Energy to accelerate clean technologies and support decarbonization efforts across the region. With over 100 companies involved to date, the program connects early-stage innovators with industry leaders, offering access to mentorship, funding, and pilot collaborations.

By creating a space where emerging technology intersects with real-world energy challenges, the CleanTech Hackathon provided participants with direct opportunities to test ideas, connect with decision-makers from across S-E Europe, and accelerate their path to market.

**In 48 hours, 130 participants developed 30 innovative energy solutions, with 14 teams advancing to the final.** The proposed solutions such as — Smart Grid Management, Prosumer Energy Trading, Predictive Maintenance using Digital Twin, AI applications in Cybersecurity and Operations, Automation using Drones and LLMs, Urban EV charging Infrastructure — directly addressed key industry challenges.

**The 14 Finalist Teams** — Reshape Digital, VoltLink, Systemio Technologies, YellowGrid Distribution, Loftrek, Innovatio Group, Software Media, Renergia, HexErgy, WiseWatts Solutions, INCAS, CleanCode, Aggranda, and PROCESIO

The banner features a blue background with a large, stylized graphic of a glowing sphere with orbiting lines on the right side. The text is arranged in a clean, modern layout. At the top left, logos for Techcelerator, the Romanian Ministry of Energy, and the Moldovan Ministry of Energy are displayed. A blue button-like shape contains the text 'Part of the CleanTech Nexus Program'. The main title 'CleanTech HACKATHON' is prominently displayed in the center-left. Below it, the text 'OPEN INNOVATION TECH CHALLENGES GENERATED BY THE COMMUNITY OF ENERGY PLAYERS IN SEE' is written. A location pin icon is next to the text 'ENERGY EXPO Laminor Arena, Bucharest (Romania)'. A date box indicates '23-24 May 2025'. At the bottom left, 'Platinum Partner' is written next to the 'ppc' logo. At the bottom right, 'Together with: ENERGY EXPO® JOIN THE EVOLUTION' is displayed.

In terms of prizes, a total of €22.000 has been awarded — including €10.000 in cash and €12.000 in development resources. In addition to the main awards, several teams received honorable mentions and were granted access to pilot projects (Proof of Concepts – PoCs) in collaboration with supporting companies.

### Top 3 Winning Teams:

- **1st Place — YellowGrid Distribution** (€5.000)

Members: Cătălin Stăncel, Sergiu Mureșan, Andrei Antohie, Cristian Cioabă

Project: YellowGrid proposed an intelligent energy management system enabling prosumers to monitor, manage, and trade surplus energy in real-time based on market prices.

- **2nd Place — WiseWatts Solutions** (€3.000)

Members: Mihaly Tordai, Mihai Sturza

Project: WiseWatts introduced an AI-powered “digital colleague” designed to optimize energy usage and support integration of renewable sources, available to users 24/7.

- **3rd Place — PROCESIO** (€2.000)

Members: Mihai Dârzan, Marian Voicu, Cuore Nica, Răzvan Țimboiu, Nicolae Irimia

Project: PROCESIO presented a dual solution — a business process automation platform & DiligenticAI, a tool for extracting and summarizing data from unstructured documents using Large Language Models, forming a full automation ecosystem.

**Honorable Mentions** — SoftwareMedia, HexErgy, Reshape Digital, INCAS, and Voltlink

During the CleanTech Hackathon 2025, **participants received direct guidance from a group of 17 experienced mentors** representing the public sector, energy industry, venture capital, and academia. Their support helped teams fine-tune their solutions, evaluate market potential, and identify clear steps for future development and implementation. **The mentors supporting the teams included:**

- **Adrian Vintilă** — Advisor to the Minister of Energy
- **Alin Crăciunescu** — Director, Grids GM Staff, Electrical Networks
- **Laurențiu Brumaru** — Head of Delivery Factory, PPC Energy
- **Andrei Mihalciu** — Partnership Growth Director, PPC Blue
- **Gabriel Popa** — Head of Project Licensing, PPC Renewables Romania
- **Mihai Stanciu** — Head of Digital Innovation, PPC Romania
- **Alexandra Voinea** — Technical Business Analyst, FintechOS
- **Alexandru Ruff** — Partner, GapMinder Ventures
- **Ștefan Iorgulescu** — Co-founder & CEO, Control F5 Software
- **Adriana Marinescu** — Enterprise Sales Executive, UiPath
- **Diana Nițescu** — CEO, Top Minds
- **Paul Murariu** — Associate Director, Kearney & Limited Partner, V7 Capital
- **Claudiu Butacu** — Co-founder, EFdeN
- **Aleodor Tabarcea** — Engineering Manager, Stripe
- **Olivian Savin** — Executive Director, FEL Romania; Young Energy Ambassador 2025
- **Marius Opreș** — Partner, Ascendis
- **Ionuț Tarcea** — Business Unit Manager, Organizational Culture, Ascendis

This competition was a clear reminder of how much can be achieved when collaboration and innovation are supported. It also highlighted the role that start-ups, technology, and cross-sector partnerships play in building practical solutions to accelerate the energy transition. **We would like to thank all our partners and sponsors whose support made the CleanTech Hackathon possible:**

- **Platinum Partner** — PPC Romania
- **Gold Partners** — Ministry of Energy of Romania, Ministry of Energy of the Republic of Moldova, Nuclearelectrica, Romgaz, Distribuție Oltenia (part of the Evryo Group), Delgaz Grid
- **Strategic Partners** — European Investment Bank, Ascendis, UiPath, Google Romania, Google Cloud, UEFISCDI, Amazon Web Services, Hubspot, Zitec, UTCN
- **Community Partners** — ACUE, HENRO, ICI Bucharest, Energy Policy Group (EPG), EFdeN, ESEIA (European Sustainable Energy Innovation Alliance), RO AI Alliance
- **Sponsors & Communication Partners** — Artesana, Eisberg Romania, Vitamin Aqua, PopCola, Bilbor, Energy Magazine, DiFine PR
- **Organizers** — Techcelerator, ROTSA, ENERGY EXPO®

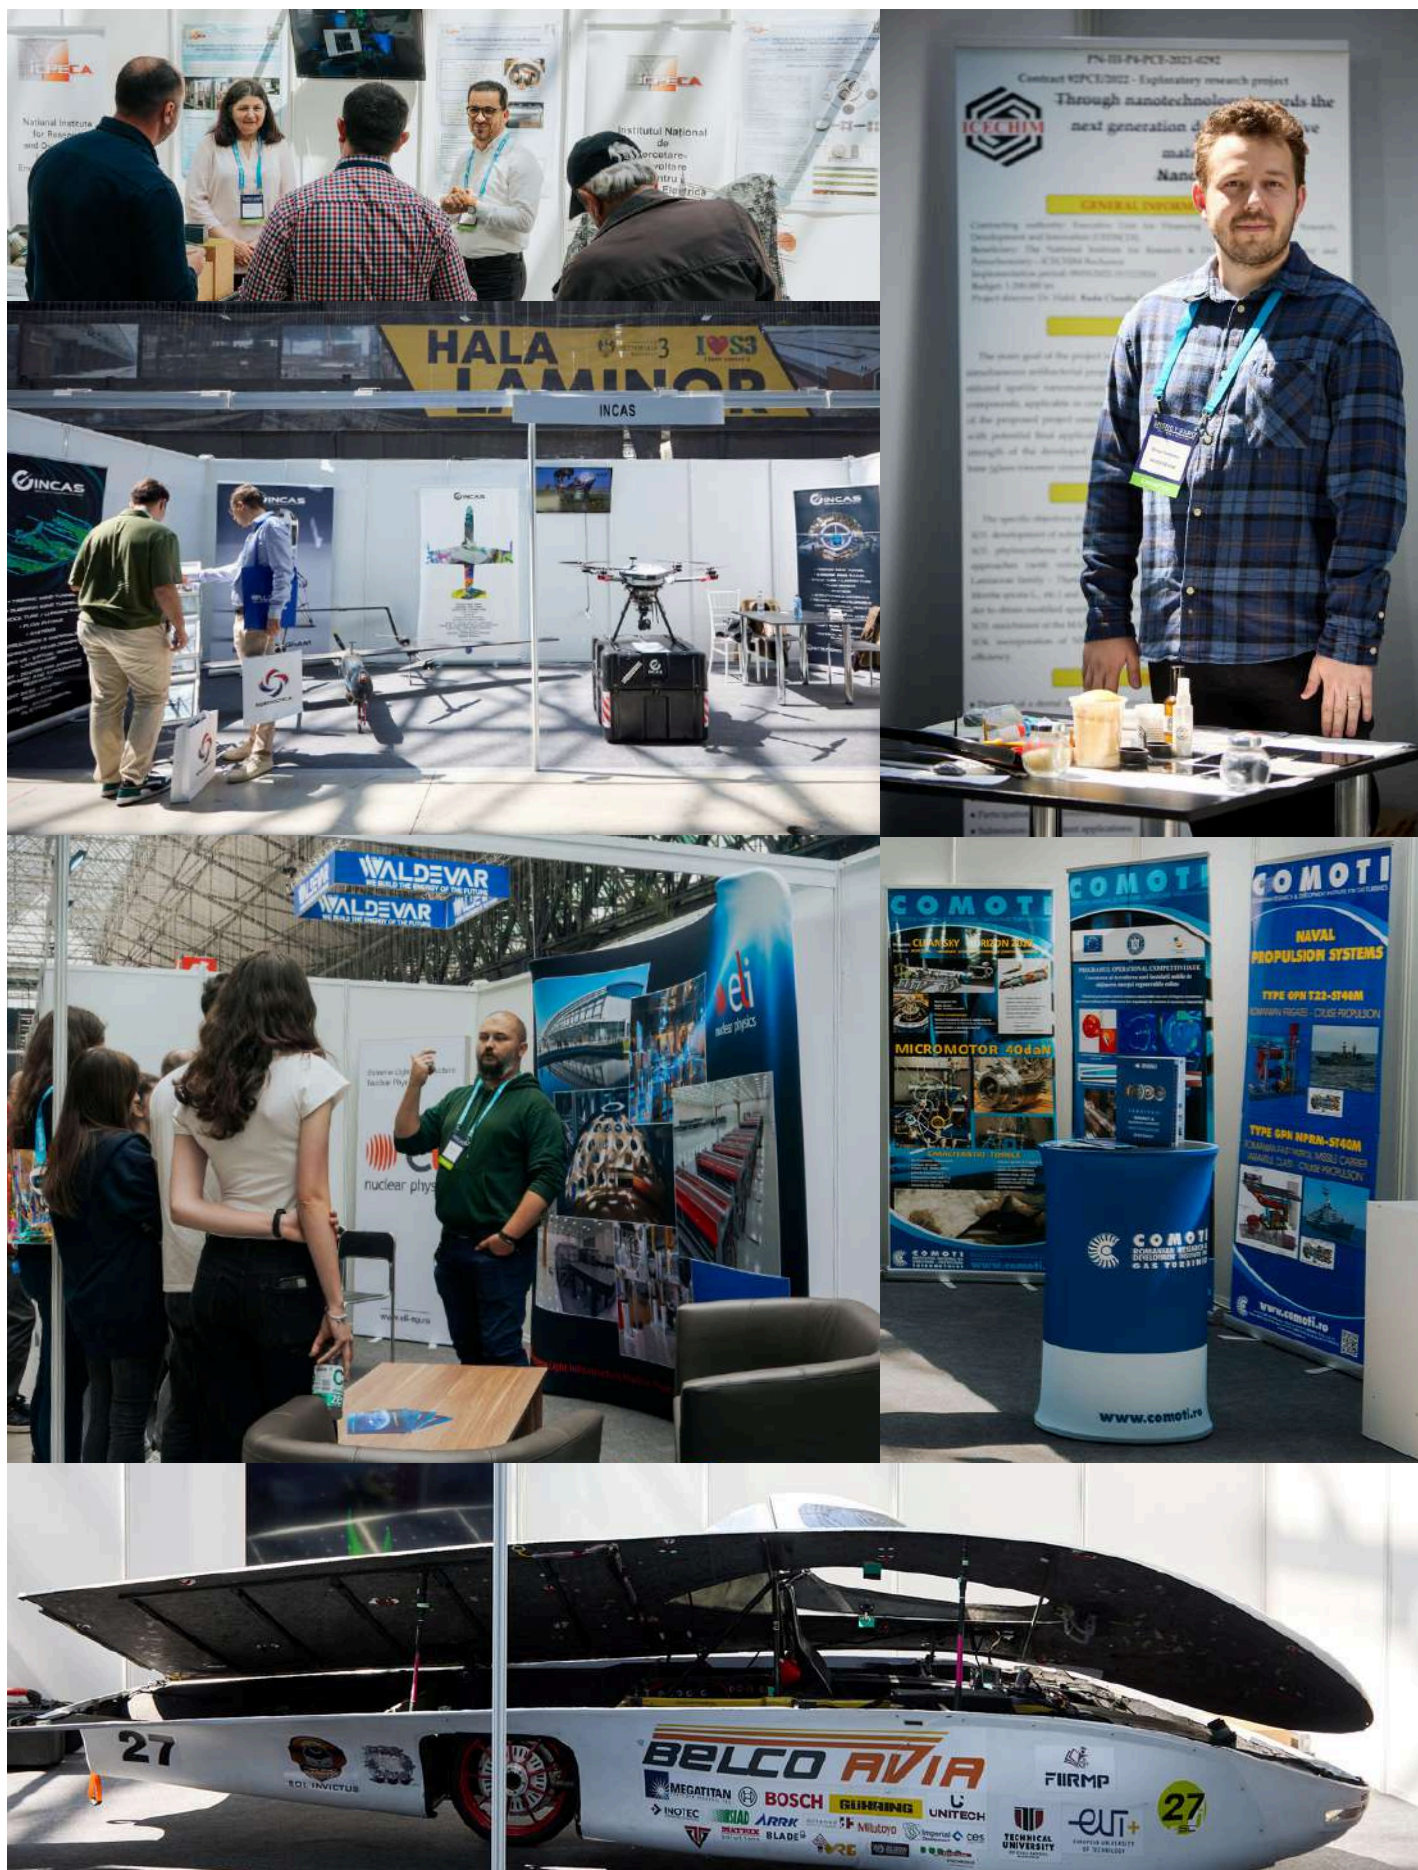

## The Scientific Research Zone

Research is essential to building a more sustainable future, and that is exactly why, **from the very first edition, ENERGY EXPO® created the Scientific Research Zone — to offer visibility to Romania's top research institutions and show the real-world impact of their work.** Focused on applied research and innovation, this zone helped bridge the gap between science, industry, and policy, creating space for dialogue, collaboration, and future projects.

**During the 2025 edition, the participating institutions included:**

- **The National Research and Development Institute for Gas Turbines COMOTI** — COMOTI is the only institute in Romania that integrates research, design, testing, and production in the field of gas turbines. At ENERGY EXPO®, it presented advanced technologies used in industrial processes and aviation, including high-efficiency cogeneration systems and natural gas compression units.
- **INCAS - National Institute for Aerospace Research "Elie Carafoli"** — INCAS is Romania's leading aerospace research center. Known for its contributions to both civilian and defense projects, it showcased infrastructure and capabilities in fluid mechanics and aerodynamics, along with its involvement in major EU programs like Horizon Europe and FlightPath 2050.
- **The National Institute for Research and Development in Electrical Engineering ICPE-CA** — Specializing in applied research for energy and electrical systems, ICPE-CA presented projects focused on electric mobility, energy efficiency, and renewable integration. Its work supports the shift to more sustainable, technology-driven industrial solutions.
- **National Institute for Research and Development in Chemistry and Petrochemistry ICECHIM** — ICECHIM focuses on green chemistry, materials science, and environmental protection. At ENERGY EXPO®, it exhibited projects related to nano-materials, sustainable polymers, and technologies aimed at reducing industrial pollution.
- **Extreme Light Infrastructure - Nuclear Physics (ELI-NP)** — ELI-NP operates the most powerful laser system in the world and leads cutting-edge research in nuclear physics and astrophysics. Its presence at ENERGY EXPO® highlighted Romania's global position in high-energy research and scientific infrastructure.
- **TUCN Racing Team – Technical University of Cluj-Napoca** — Formed by engineering students from the Technical University of Cluj-Napoca, the TUCN Racing Team develops solar-powered vehicles that compete in international sustainability challenges. Their presence reinforced the importance of student innovation and hands-on research in the clean mobility sector.

## #LOOPChallenge

**This year, ENERGY EXPO® also launched LOOP Academy — a pilot platform designed to mobilize generations X, Y, and Z in the fight for a better future.** Its first project, #LOOPChallenge, was developed in partnership with the Romanian Ministry of Education and Research and the Bucharest School Inspectorate, bringing environmental education to life in a creative and interactive way.

Launched in April 2025, the #LOOPChallenge invited primary and middle school students across Bucharest to reinterpret Constantin Brâncuși's iconic "Endless Column" using only recycled materials. The project aimed to spark creativity while helping students to better understand circular economy concepts and the importance of sustainability in everyday life.

**Over 370 students and 20 teachers from 15 schools — representing all six districts of Bucharest — joined the challenge. In total, 24 reinterpretations of the Endless Column were submitted between April 15 and May 15.** These were displayed throughout all three days of ENERGY EXPO® 2025, allowing visitors to view the projects and vote for their favorite using a dedicated QR code and the ENERGY EXPO® mobile app.

The winning project, "*Coloana Valorilor Umane*" (*The Column of Human Values*), created by Class 8C from School No. 97 in Sector 4 and coordinated by teacher Ancuța Stancu, received the highest number of votes. The students have been present at ENERGY EXPO® every day, actively engaging with visitors and sharing the story behind their project — an initiative that ultimately secured them the win.

**While it may have looked like a simple competition, the stakes of the #LOOPChallenge were very high. The first-place prize means that School No. 97 will become the first public school in Bucharest to be equipped with a custom-built solar and storage system, provided by WALDEVAR Energy, LONGi, PRIME Batteries Technology, and APERS, with support from the Municipality of Sector 4.**

In total, prizes awarded across #LOOPChallenge amounted to over €20.000 — made possible thanks to our sponsors and partners: The Romanian Ministry of Education and Research, The Bucharest School Inspectorate, Acer, Aqirys, Asus, Sound Masters, EDENLAND Park, Destiny Park, PPC Blue, Hidroelectrica, Eurowind Energy, and IKEA.

### #LOOPChallenge 2025 Award Winners:

- **1st Place** - "*The Column of Human Values*" — Coordinating teacher: Ms. Ancuța Stancu – School No. 97
- **2nd Place** - "*Infinite Blue*" — Coordinating teachers: Ms. Otilia Nuță and Ms. Roxana Iorga – School No. 97
- **3rd Place** - "*The Earth Blooms from Infinite Care*" — Coordinating teacher: Ms. Achim Daniela-Paula – Ion I.C. Brătianu School
- **Popularity Award** - "*EcoInfini*" — Coordinating teacher: Ms. Radu Lissu Maria – Sf.

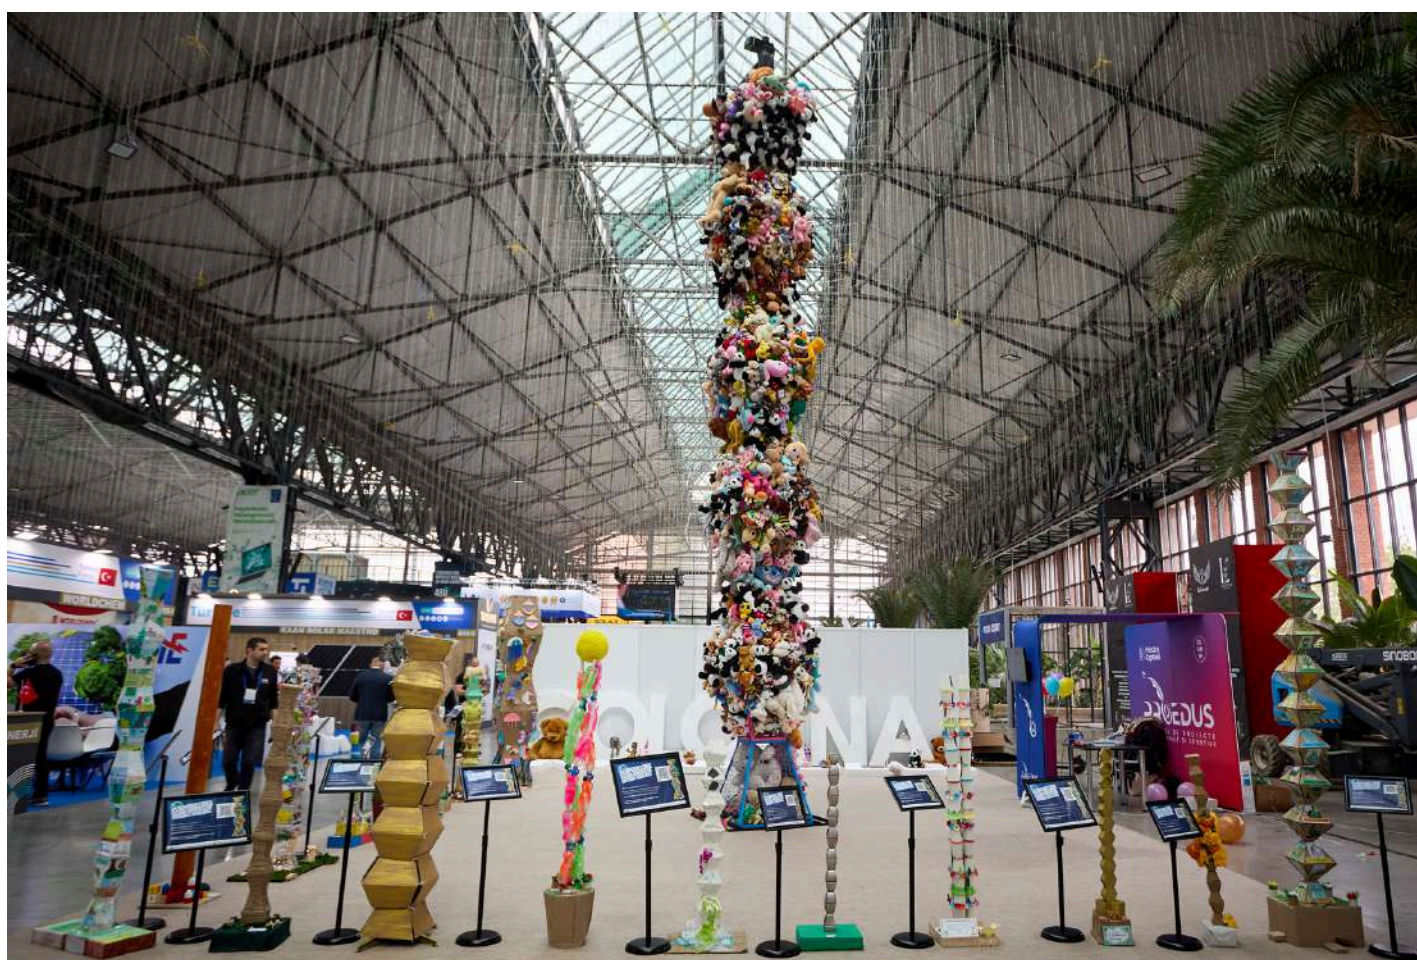

## The Plush Endless Column

In addition to the Endless Columns created by students, **ENERGY EXPO® 2025 also launched a city-wide CSR initiative designed to engage local communities and inspire collective action.** The goal? To build the largest reinterpretation of Brâncuși's Endless Column — made entirely from plush toys.

With support from our partners, modular sections of the plush toy column have been placed ahead of the event at various collection points throughout Bucharest, including Yellow Tree office buildings, Destiny Park, ParkLake Shopping Center, PPC Romania Headquarters, Cubic Center, and the Nu Mai Port event. From May 22 to 24, ENERGY EXPO® visitors also had the option to donate a plush toy instead of purchasing a ticket — a simple gesture that granted them free access to the event.

**Thanks to these efforts, over 18.200 plush toys have been collected — enough to build a 10.9-meter-tall Endless Column,** assembled live during ENERGY EXPO® 2025. Additionally, all funds raised from ticket sales during the event have been donated to Taxiul cu Bomboane to help sanitize and prepare the collected toys for distribution. **Starting on June 1st, International Children's Day, all the plush toys have been delivered to less fortunate kids — thanks to Taxiul cu Bomboane —** closing the loop on a project that really transformed community engagement into lasting, tangible impact.

## Treasure Hunt

Similar to the first edition, ENERGY EXPO® 2025 brought an extra dose of energy and engagement through the **ENERGY EXPO® Treasure Hunt — an interactive experience designed to boost visibility for exhibitors and encourage visitors to explore every corner of the event.**

To enter the competition, participants had to scan QR codes hidden throughout the venue — at exhibitor booths, the Grand Arena (during conferences and workshops), and other key areas — collecting points through the official ENERGY EXPO® mobile app. So, the more you explored, the higher your chances of winning. This format not only added excitement to the visitor experience but also ensured that all exhibitors, regardless of their location, received meaningful traffic and interaction.

Compared to last year, when the grand prize has been a hydrogen bike provided by WALDEVAR Energy, this year we decided to raise the bar. **The 2025 grand prize was a solar carport (Model CP 06) offered by TODOME, fully equipped with a Huawei 3KW single-phase inverter and Tiger Neo 54HL4R-(V) photovoltaic panels supplied by Solar Today Romania.**

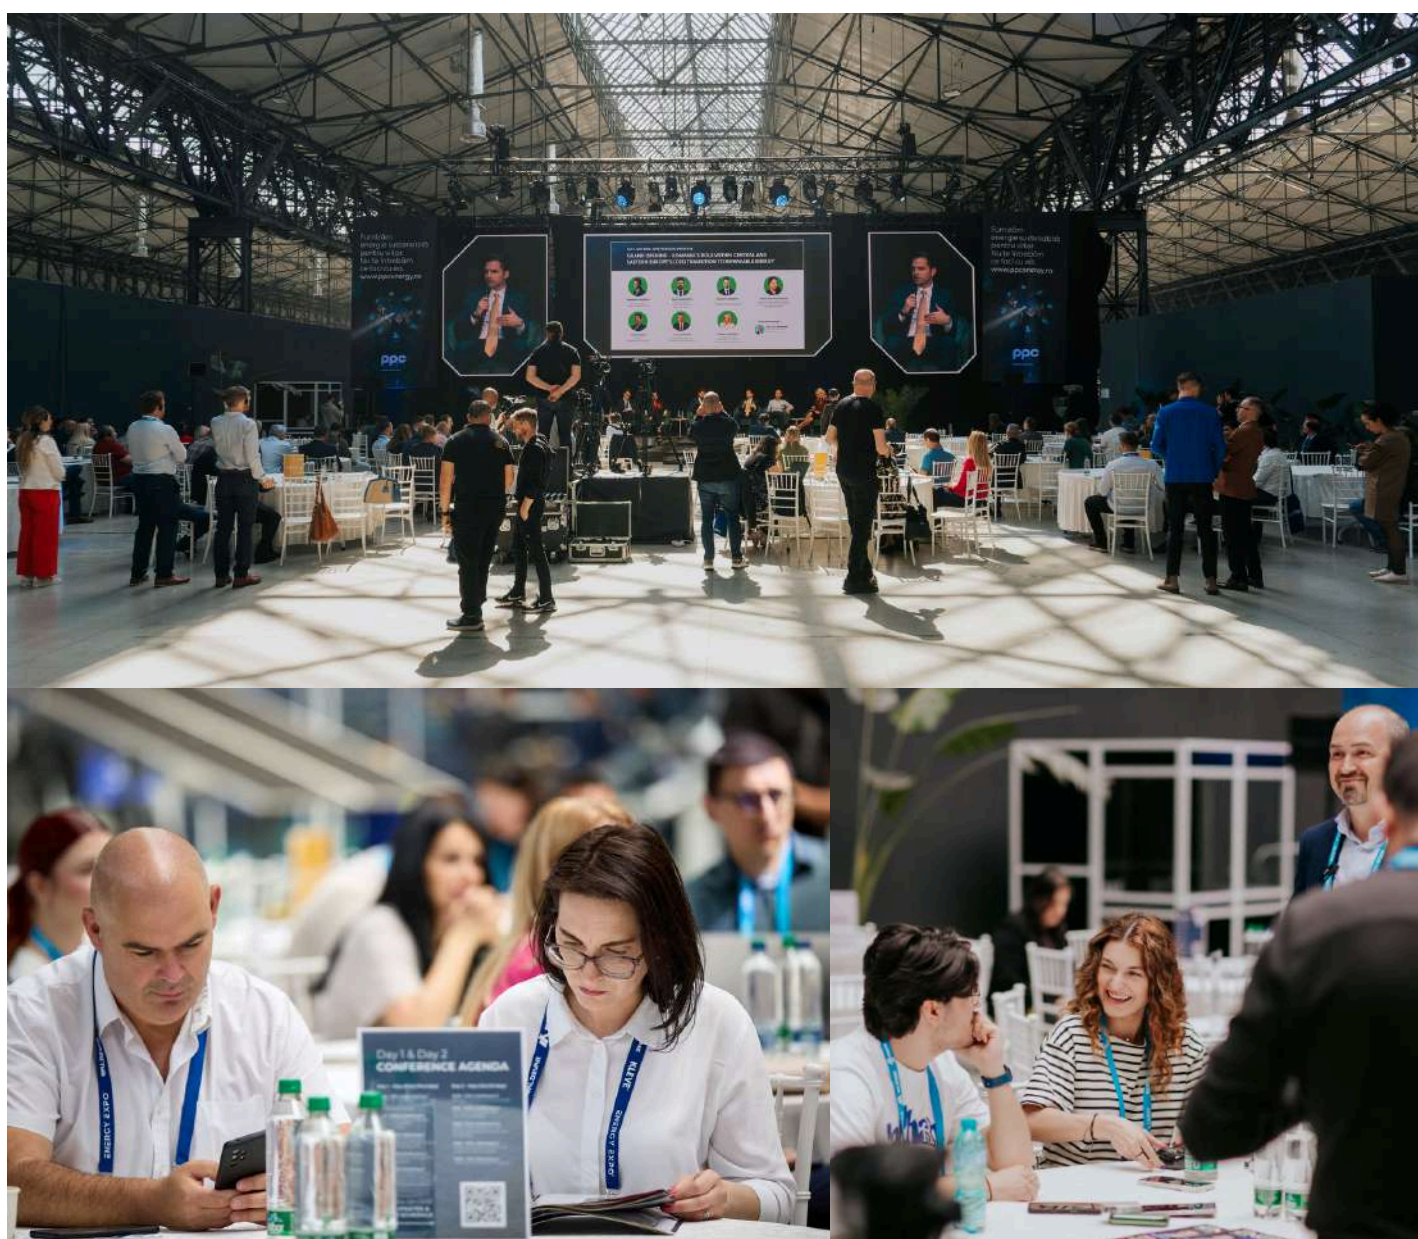

The second-place winner received a Wallbox Pulsar Pro charging station (Mode 3), offered by PPC Blue, while third place was awarded a Garmin Enduro 3 smartwatch. Prizes for fourth through ninth place included a Huawei Watch GT 5 and five Maxcom mRing MR100 smart rings.

## IV. Conferences & Workshops

During ENERGY EXPO® 2025, **14 conferences and workshops** have been held on the Main Stage (Grand Arena). The edition was officially inaugurated by Romania's Minister of Energy — Sebastian Burduja, and Moldova's Minister of Energy — Dorin Junghietu. Although unable to attend in person, Ditte Juul Jørgensen, Director-General for Energy at the European Commission, shared a powerful message for the participants and Romanian companies.

On May 22 and 23, the focus of the conferences has been on the B2B and B2G sectors, while on Saturday, May 24, shifted toward end-users, with dedicated B2C workshops on nearly Zero-Energy Buildings (nZEB). **These sessions have been made possible thanks to our stage partners — PPC Romania, WALDEVAR Energy, and Casa Magazin — and the 83 industry specialists who took the stage to share their knowledge, insights and experiences.**

## Day 1 — May 22nd, 2025 (Thursday)

### 10:00 - 11:15 | GRAND OPENING. Romania's role within Central and Eastern Europe's (CEE) Transition to Renewable Energy (RO)

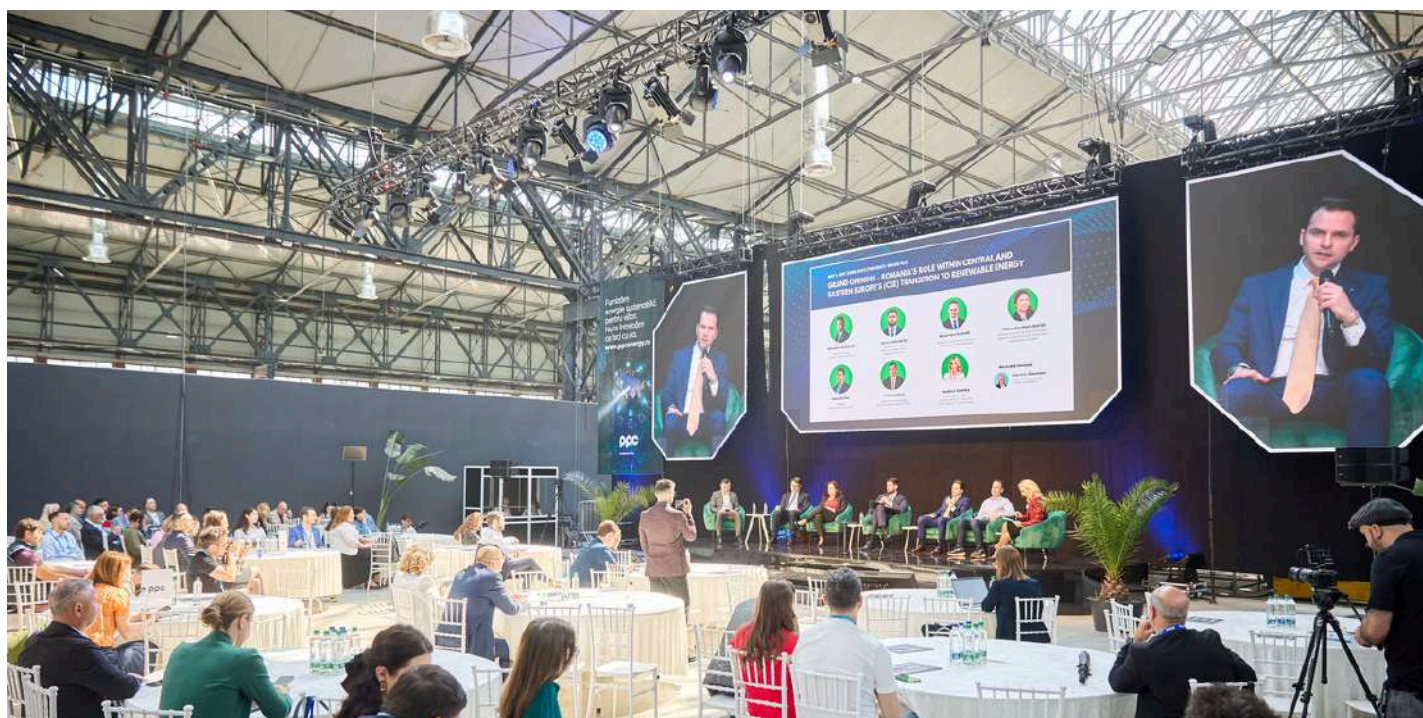

**Summary** — A broad discussion focused on Romania's diverse energy mix, strategic location, and contributions to energy security. It highlighted the country's potential to lead the region's green energy transformation and its role in shaping the broader European and global energy markets.

**Panel Moderated by Teodora TOMPEA** (Journalist & Creator, "Planeta ești tu!" — The First TV Show about Climate Change)

- **Sebastian BURDUJA** — Minister of Energy, Ministry of Energy Romania
- **Dorin JUNGHIETU** — Minister of Energy, Ministry of Energy of the Republic of Moldova
- **Ditte JUUL JØRGENSEN** — Director-General for Energy, European Commission
- **Alexandru NAZARE** — Member of the Board of Directors, The National Bank of Romania (NBR)
- **Alexandra-Maria BOCȘE** — Director for Institutional and International Relations, Romanian Investment and Development Bank (BID)
- **Radu DUDĂU** — President, Energy Policy Group (EPG)
- **Liviu GAVRILĂ** — Vice President, Romanian Wind Energy Association (RWEA)

## Day 1 — May 22nd, 2025 (Thursday)

### 11:45 - 13:00 | CONFERENCE 1. Romania's Energy Landscape: Tradition, Transition, Transformation (RO)

**Summary** — Conference panel focused on Romania's energy future, addressing the balance between traditional energy sources and the shift to renewable energy, the challenges and opportunities in modernizing Romania's energy infrastructure, driving sustainability, and enhancing the country's position within the broader European energy landscape.

**Panel Moderated by Teodora TOMPEA** (Journalist & Creator, "Planeta ești tu!" — The First TV Show about Climate Change)

- **Roxana TOMPEA** — Investment Director, Nuclearelectrica
- **Marian FETIȚA** — CFO, Hidroelectrica
- **Radu CĂPRĂU** — Member of the Executive Board responsible for Refining & Marketing, OMV Petrom
- **Daniela DĂRĂBAN** — Executive Director, ACUE
- **Adrian DOBRE** — Country Manager Romania, Eurowind Energy
- **Marcela LEFTER** — President, Women in Energy Moldova (WEM) & CEO and Founder, Sedera Green

## Day 1 — May 22nd, 2025 (Thursday)

### 14:00 - 14:45 | WORKSHOP 1. Innovations in Floating PV, powered by WALDEVAR Floating PV Systems & Sungrow Floating FPV (EN)

**Summary** — This workshop focused on addressing the latest advancements in floating photovoltaic (PV) technology, highlighting the innovations that are shaping the future of solar energy.

#### Workshop Delivered by WALDEVAR Floating PV Systems & SUNGROW FPV

- **Alessandro AMATO** — CEO, WALDEVAR Floating PV Systems
- **Daniel DRAGOMIR** — COO, WALDEVAR Floating PV Systems
- **Chloe HE** — Regional Director, SUNGROW FPV SCI. & TECH.CO., LTD

## Day 1 — May 22nd, 2025 (Thursday)

### 15:00 - 16:15 | CONFERENCE 2. Energy Efficiency Strategies for Major Consumers (RO)

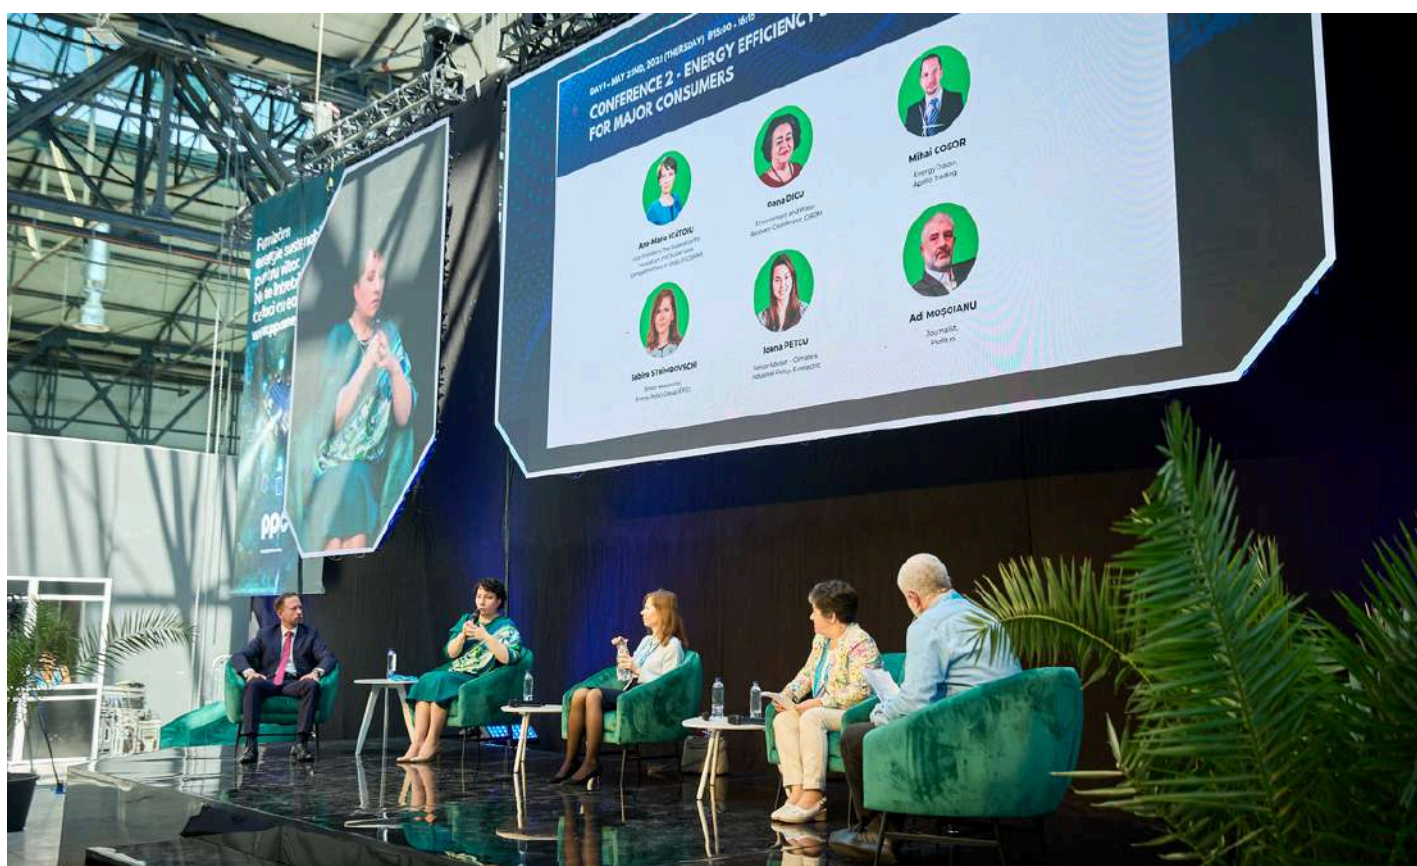

**Summary** — The panel focused on energy efficiency strategies and initiatives implemented by large-scale energy consumers across various industries. Attendees gained insights into practical solutions, innovative technologies, and best practices that had been demonstrated to effectively reduce energy consumption and operational costs.

**Panel Moderated by Adi MOȘOIANU** (Journalist, PROFIT.RO)

- **Ana-Maria ICĂTOIU** — Vice President, The Federation for Innovation and Sustainable Competitiveness in SMEs (FICSIMM)
- **Oana DICU** — Environment and Waste Recovery Coordinator, CIROM
- **Mihai COSOR** — Energy Trader, Apollo Trading
- **Sabina STRÎMBOVSCHI** — Senior Researcher, Energy Policy Group (EPG)
- **Ioana PETCU** — Senior Advisor - Climate and Industrial Policy, Eurelectric (Special Video Message)

## Day 1 — May 22nd, 2025 (Thursday)

### 16:30 - 17:15 | WORKSHOP 2. BIG STORE: Professional Tools and Equipment Showcase for the Energy Industry, with Live Demo featuring Milwaukee Solutions (RO)

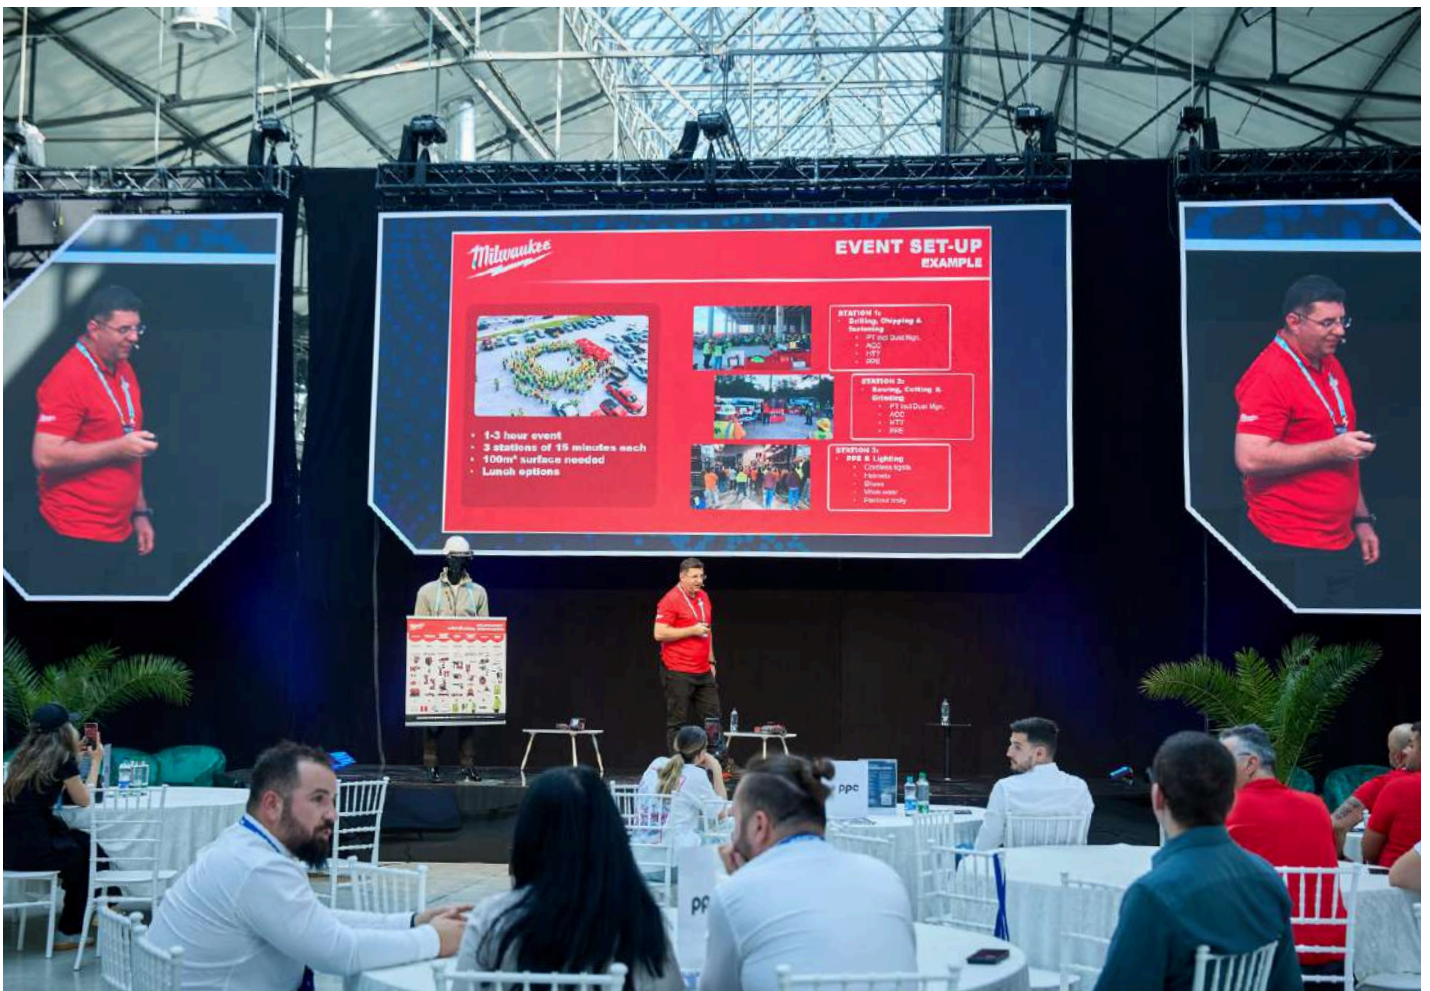

**Summary** — Participants joined MILWAUKEE®'s mission to eliminate risks and set the highest safety standards. This insightful workshop went beyond tools — it was about transforming how teams worked, thought, and protected themselves, redefining safety in the modern construction world. Whether they were safety managers, team leaders, or simply dedicated to improving job site safety, attendees had the opportunity to help shape a safer future by joining Milwaukee's Safety Concept — Project Zero, a bold initiative that strives for zero accidents, zero emissions, and zero compromises.

#### Workshop Delivered by BIG STORE

- **Ștefan GOGOLAN** — BDM PPE, Milwaukee Romania

## Day 2 — May 23rd, 2025 (Friday)

### 10:00 - 11:15 | CONFERENCE 3. EPC 360°: Infrastructure & Growth (RO)

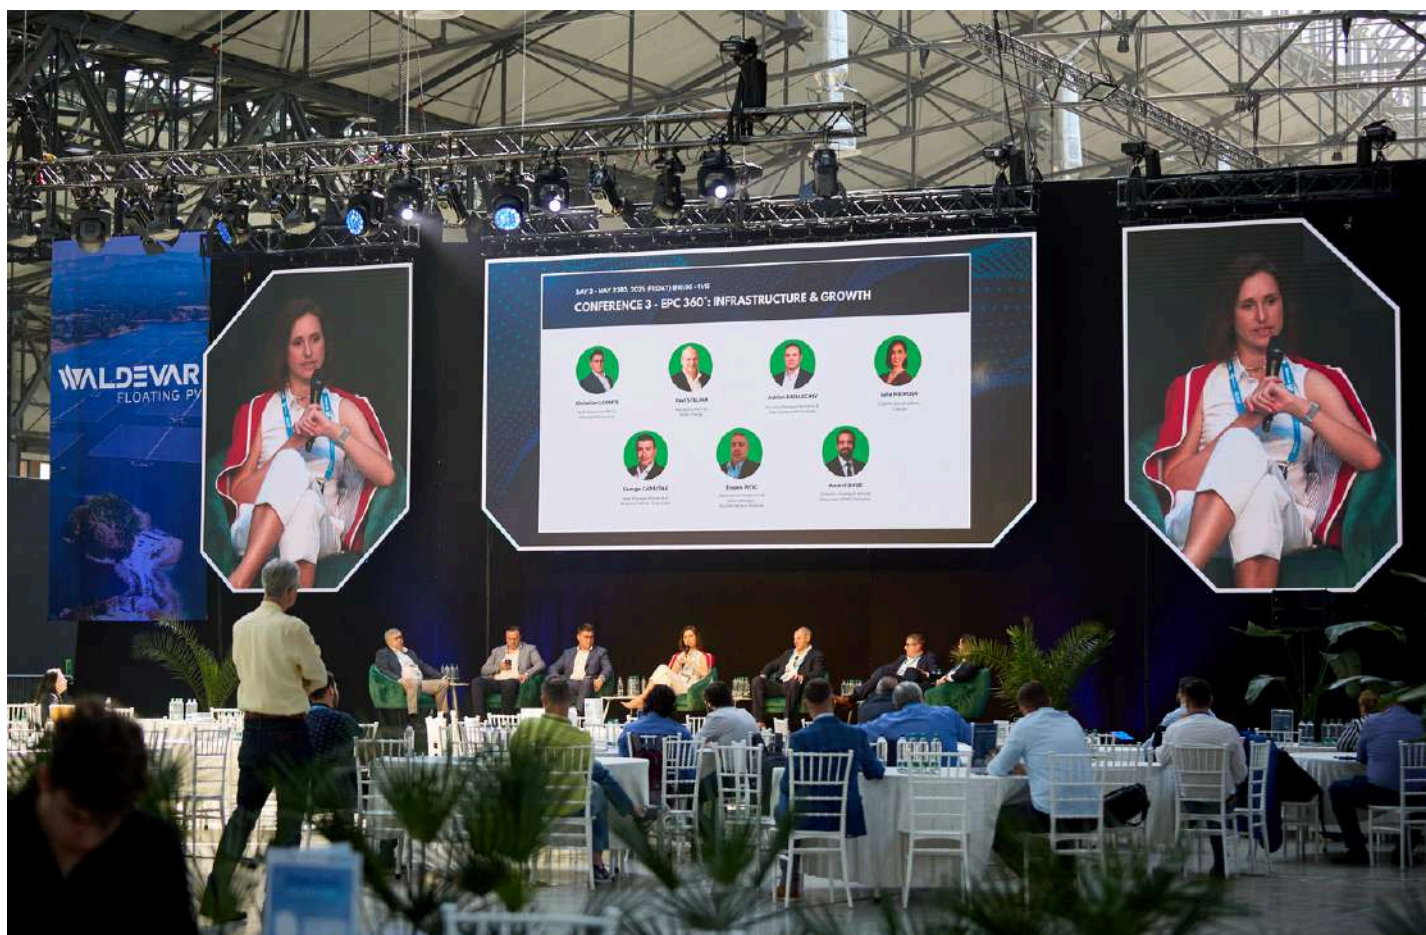

**Summary** — Panel focused on strategies leveraged by EPC companies to enhance project delivery, promote sustainability, and attract investment for large-scale infrastructure projects. It also highlighted key trends, innovative solutions, and best practices that drove success in infrastructure development within the energy sector.

**Panel Moderated by Andrei BUȘE** (Director - Energy and Natural Resources, KPMG Romania)

- **Christian LEONTE** — CEO, WALDEVAR Holding
- **Favi STELIAN** — Managing Partner, Nofar Energy
- **Adrian PARASCHIV** — Country Manager România & Rep. Moldova, Photomate
- **Iulia MEIROȘU** — CFO, Enexus
- **George CĂPĂȚÎNĂ** — Sales Manager Romania & Bulgaria Utilities, Trina Solar
- **Eugen PITIC** — Business Development & Sales Manager, YEO Romania & Moldova

## Day 2 — May 23rd, 2025 (Friday)

### 11:45 - 13:00 | CONFERENCE 4. Innovation Roadmap 2025: Trends & Strategies (RO)

**Summary** — This conference explored emerging trends and strategies, innovations, technological advancements, and market shifts that were shaping the future of the energy sector.

**Panel Moderated by Teodora CIMPOI** (Chief Editor, Energy Magazine)

- **Cristian DRAGOMIR** — CEO, WALDEVAR Energy
- **Vicențiu CIOBANU** — CEO, Prime Batteries Technology
- **Adrian BOROTEA** — Country Manager, VERBUND Wind Power Romania
- **Vlad PÎRĂIANU** — Chief Technical Officer, Alive Capital
- **Mihai VIȘEROIU** — Representative, EIT InnoEnergy Hub Romania
- **Olivian SAVIN** — Executive Director, Future Energy Leaders (FEL) Romania & Young Energy Ambassador 2025, European Commission

## Day 2 — May 23rd, 2025 (Friday)

### 14:00 - 15:15 | CONFERENCE 5. Solar PV Manufacturers: The Bridge Between Innovation & Challenges (RO)

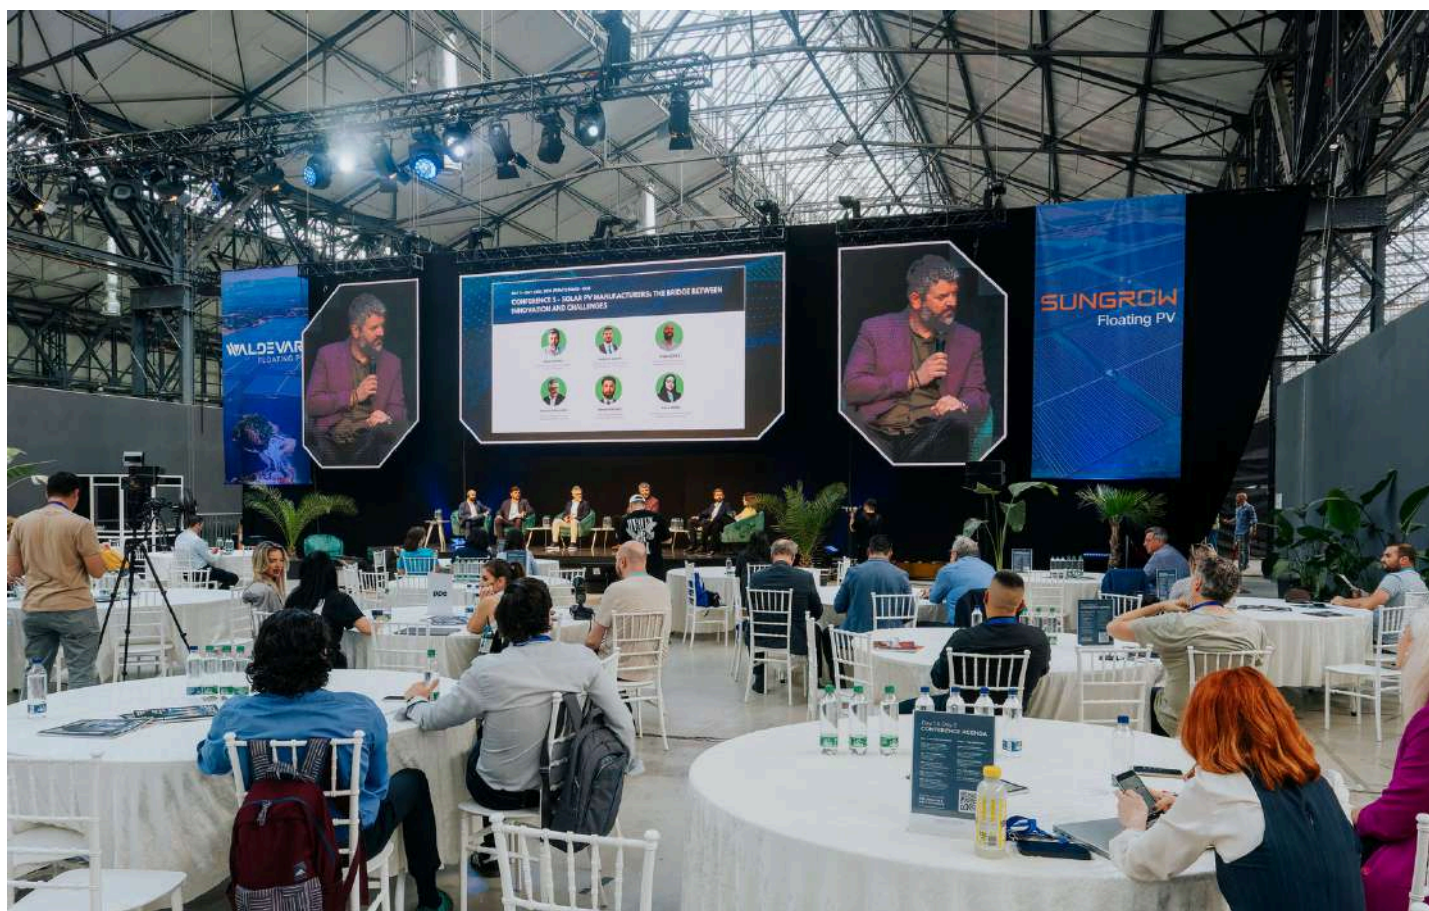

**Summary** — As the global demand for solar energy accelerates, major PV manufacturers find themselves at a pivotal moment characterized by rapid innovation and increased competition. The panel brought together leading solar panel manufacturers to discuss the evolving landscape, how they navigated supply chain pressures, achieved cost efficiency, and maintained quality standards in an increasingly competitive global market.

**Panel Moderated by Irene MIHAI** (Policy Officer, Romanian Photovoltaic Industry Association)

- **Mirel JARNEA** — Business Development Manager SEE, LONGi Solar
- **Valentin SAVIN** — Business Development Manager Utility RO,BG,MD, AIKO Energy
- **Pablo LÓPEZ** — Technical Pre-Sales Projects Manager Southwest, JA Solar
- **Andrei CARLAONT** — Country Manager Romania, SolarToday Eastern Europe
- **Rareș HURGHIS** — FEL Global Member & Board Advisor, FEL Romania

## Day 2 — May 23rd, 2025 (Friday)

### 15:30 – 16:15 | WORKSHOP 3. UrbanizeHub: Best Practices for Public-Private Innovation (EN)

**Summary** — How can we accelerate the transition toward climate neutrality with limited public resources and growing complexity? The answer lies in collaboration. As cities face mounting pressure to innovate and decarbonize, new forms of cooperation between the public and private sectors are not just helpful — they are essential.

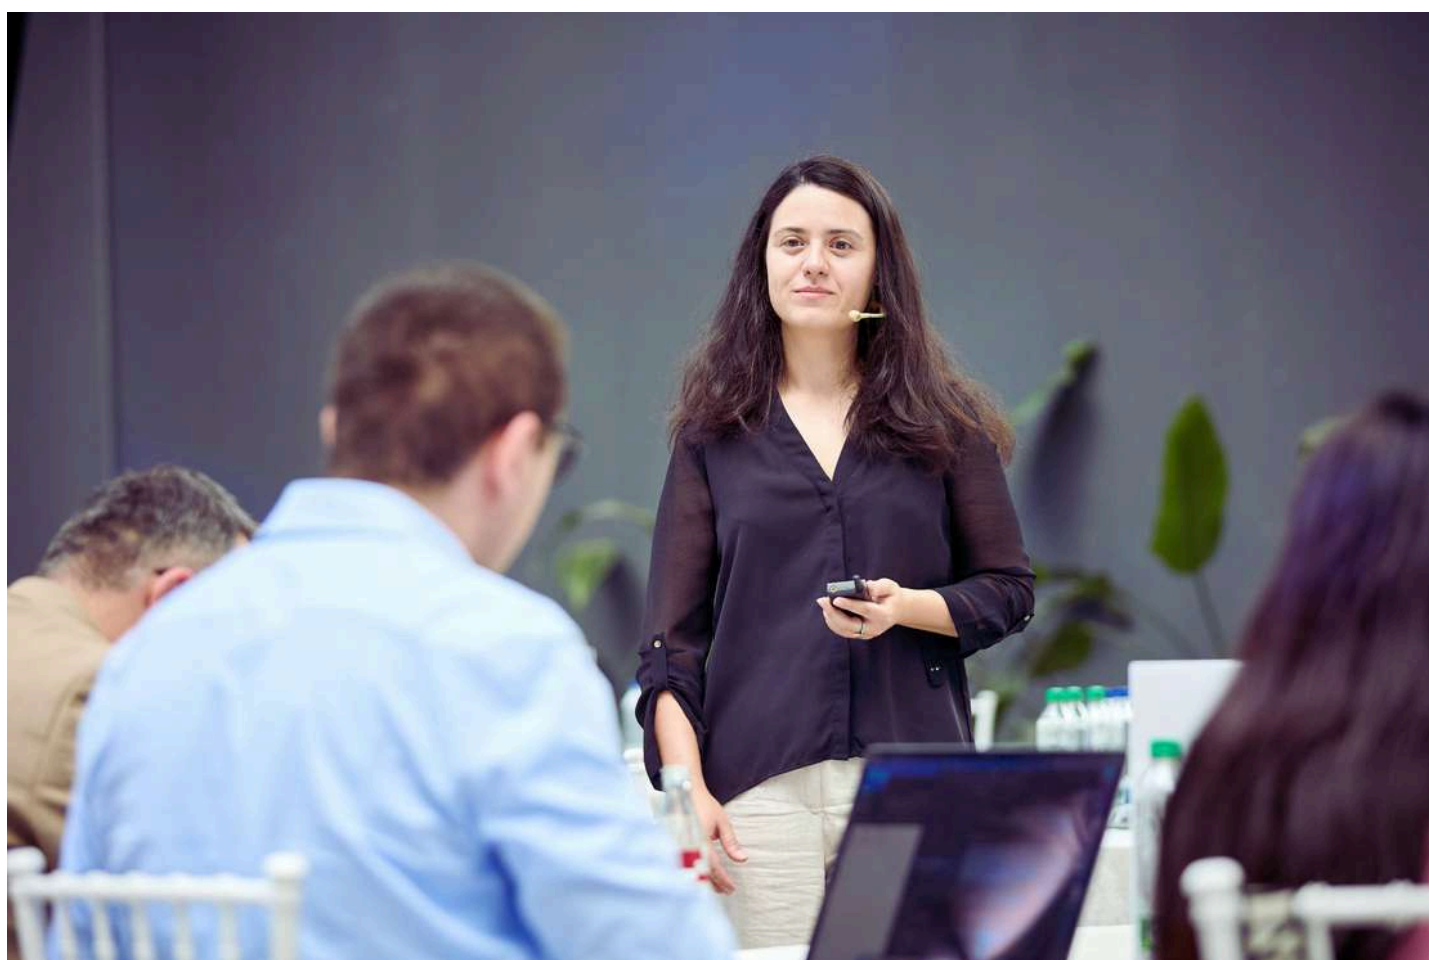

Participants joined to explore how Public-Private Partnerships (PPPs) unlocks innovation, manages risks, and creates lasting value for communities navigating the green transition. They discovered successful models, explored practical tools from the new Best-Practice Guide for PPPs, and reflected on how these partnerships shape sustainable urban futures — starting right where they were.

#### Workshop Delivered by UrbanizeHub

- **Diana DOBRIN** — Sustainable Innovation Lead, UrbanizeHub
- **Grațian MIHĂILESCU** — Founder & Director, UrbanizeHub

- <https://www.youtube.com/watch?v=MY-W9iX5agI>

## Day 2 — May 23rd, 2025 (Friday)

### 16:30 - 17:15 | Workshop 4. CleanTech Hackaton Workshop (RO)

**Summary** — Moderated by Techcelerator, this workshop was a call to action for those ready to challenge the status quo. In the CleanTech sector, true innovation demands more than just ideas — it takes bold thinking, relentless testing, and the courage to turn ambition into impact. Through inspiring ideas, interactive discussions, and practical insights, the workshop aimed to lead by example — demonstrating how courage, hard work, collaboration, and engaged partners redefined our future into a more sustainable one.

#### Workshop Delivered by Techcelerator

- **Cristian DASCĂLU** — Managing Partner & CoFounder, Techcelerator
- **Cristina ȚONCU** — Programs Partner & CoFounder, Techcelerator
- **Sebastian SITEU** — Student, Technical University of Cluj-Napoca - TUCN Racing Team
- **Ștefan BODI** — PhD Associate Professor, Technical University of Cluj-Napoca - TUCN Racing Team
- **Mihai Sebastian** — Engineer, INCAS - National Institute for Aerospace Research „Elie Carafoli”

## Day 3 — May 24th, 2025 (Saturday)

### 10:00 - 10:45 | Workshop 5 by Casa Magazin. Sustainability & Energy Efficiency: Smart Electrical Installations (RO)

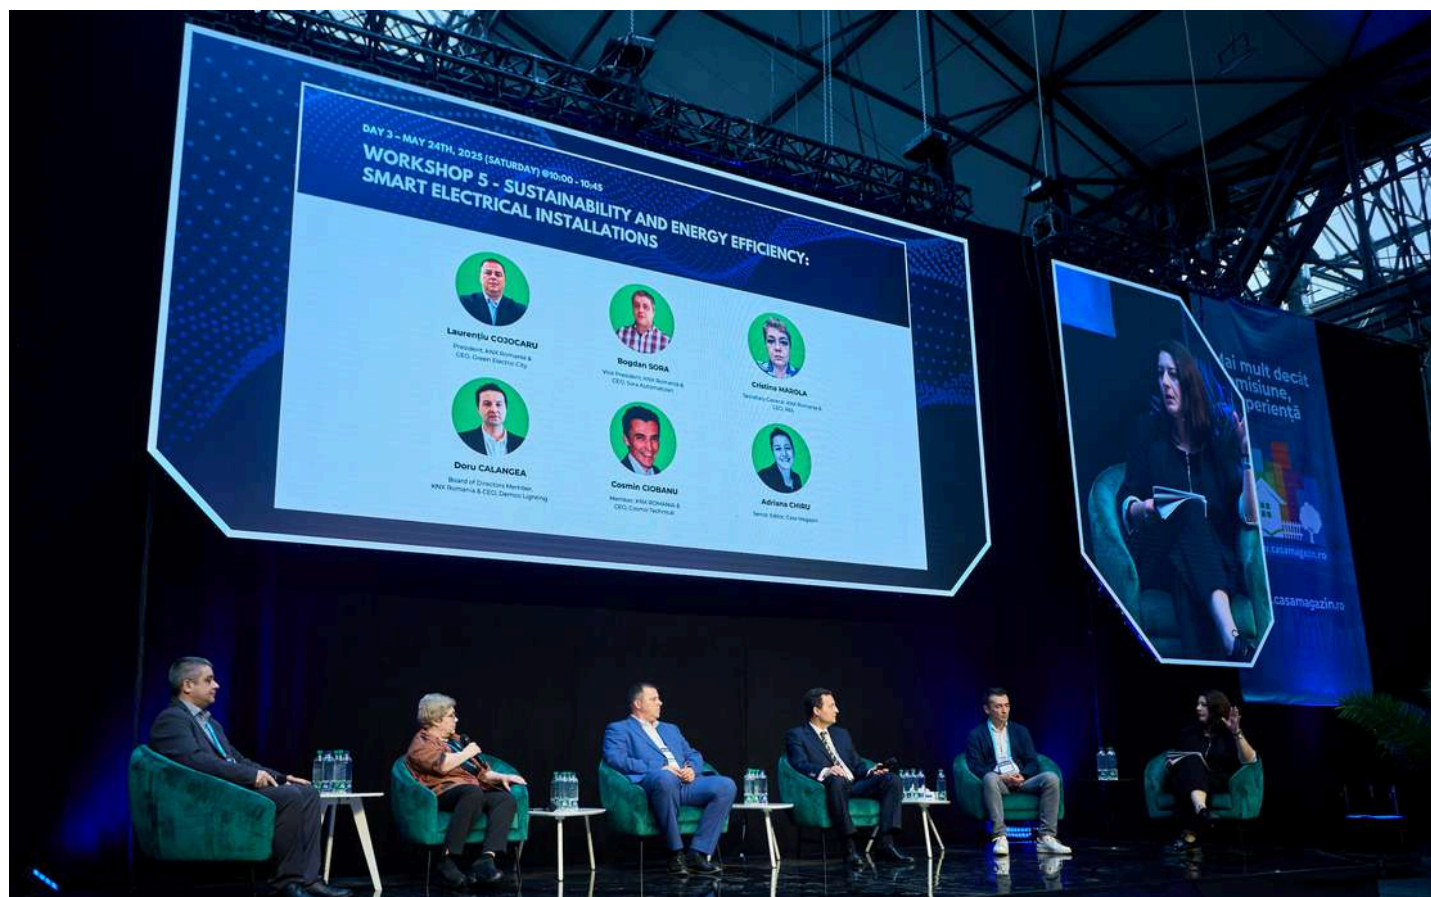

**Summary** — How could smart electrical installations and sustainable practices drive energy efficiency? From smart automation and simple upgrades following sustainable best practices to new technologies in electrical installations, this workshop addressed how these innovations reshaped the design, renovation, and operation of both residential and commercial buildings.

**Panel Moderated by Adriana CHIRU** (Senior Editor, Casa Magazin)

- **Laurențiu COJOCARU** — President, KNX Romania & CEO, Green Electric City
- **Bogdan SORA** — Vice President, KNX Romania & CEO, Sora Automatizari
- **Cristina MAROLA** — Secretary General, KNX Romania & CEO, R&S
- **Doru CALANGEA** — Board of Directors Member, KNX Romania & CEO, Demco Lighting
- **Cosmin CIOBANU** — Member, KNX ROMANIA & CEO, Cosmo Technical

## Day 3 — May 24th, 2025 (Saturday)

### 11:00 - 11:45 | Workshop 6. by Casa Magazin. SmartConstruct: Building Sustainable Homes (RO)

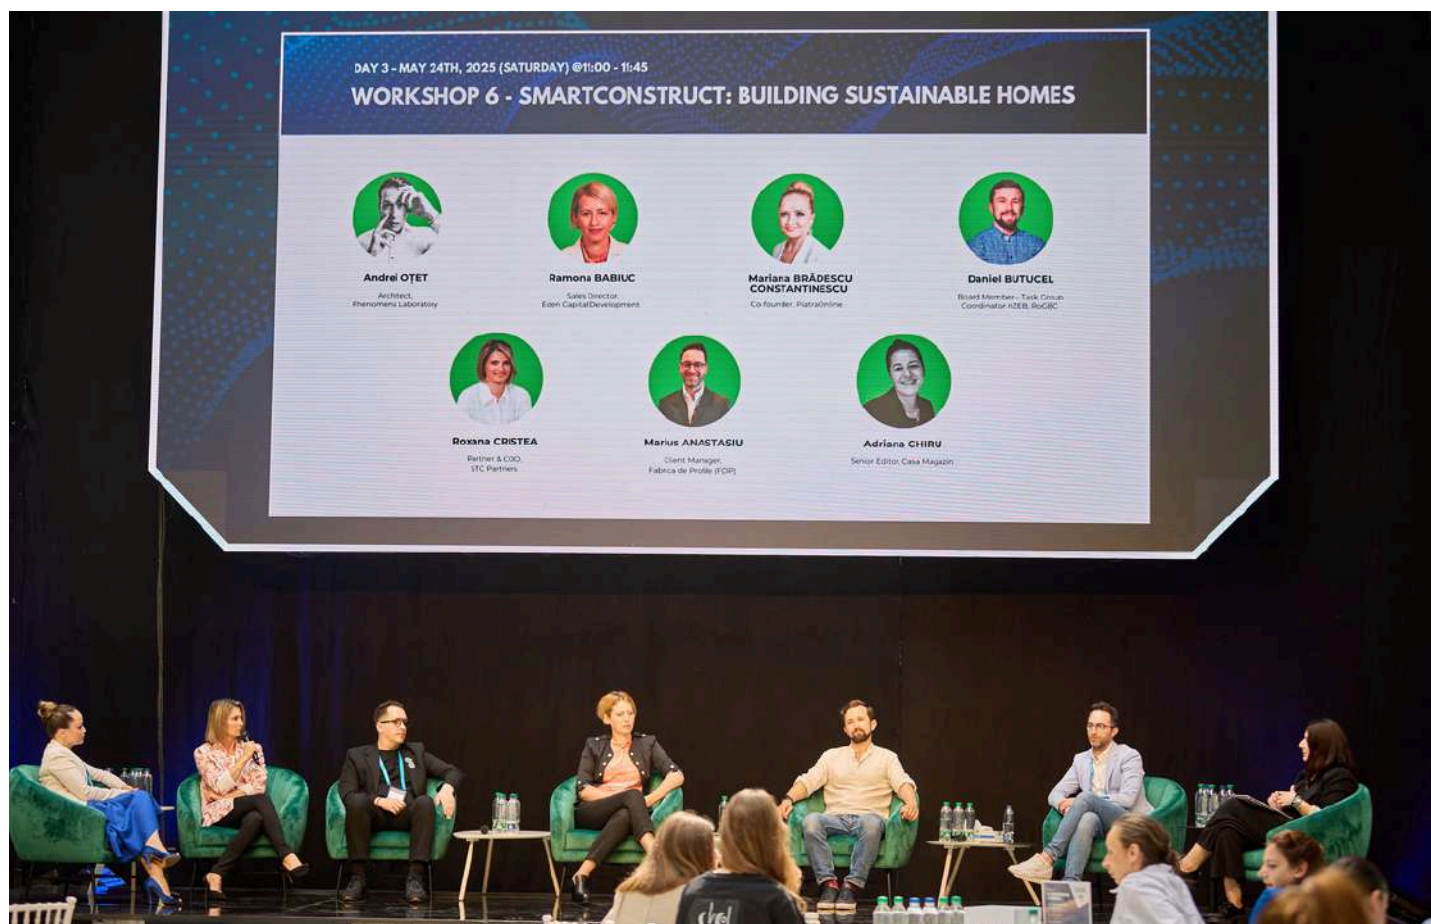

**Summary** — By exploring the latest trends in green construction, including energy-efficient designs, sustainable building materials, and environmentally responsible practices, this workshop provided attendees with valuable insights on how to build or transform their homes into both eco-friendly and cost-effective spaces.

**Panel Moderated by Adriana CHIRU** (Senior Editor, Casa Magazin)

- **Andrei OȚET** — Interior Architect, Phenomena Laboratory
- **Ramona BABIUC** — Sales Director, Eden Capital Development
- **Mariana CONSTANTINESCU-BRĂDESCU** — Co-founder, PiatraOnline
- **Daniel BUTUCEL** — Board Member - Task Group Coordinator nZEB, RoGBC
- **Roxana CRISTEA** — Partner & COO, STC Partners
- **Marius ANASTASIU** — Client Manager, Fabrica de Profile (FDP)

## Day 3 — May 24th, 2025 (Saturday)

### 12:00 - 12:45 | Workshop 7 by Casa Magazin. Strategic Energy Investments, Key Towards Smart Cities (RO)

**Summary** — During this workshop, participants discovered key funding solutions and innovations that are transforming cities and communities into smarter, greener, and more energy-efficient ones for future generations, to understand how strategic energy investments are driving the future of smart cities.

**Panel Moderated by Adriana CHIRU** (Senior Editor, Casa Magazin)

- **Raluca BOROS** — Founder, Roof Architecture
- **Valeriu PANAIT** — Deputy CEO & Director of EPC Business Unit, Polytrade
- **Adrian GOCIU** — Managing Partner, Gociu și Asociații Societate Civilă de Avocați
- **Andreea NICOLAE** — Client Relationship Manager, North Bucharest Investments
- **Robert ZOTESCU** — PhD Architect & University Assistant at the Department of Architectural Design Fundamentals

## Day 3 — May 24th, 2025 (Saturday)

### 14:00 - 14:45 | Workshop 8 by Casa Magazin. Next-Gen Energy 4 Homes (RO)

**Summary** — This workshop explored how to future-proof homes with next-generation energy solutions. Attendees received guidance on energy storage options, solar panels, solar carports, efficient heat pumps, and smart metering systems — helping them navigate the prosumer path while unlocking significant savings.

**Panel Moderated by Adriana CHIRU** (Senior Editor, Casa Magazin)

- **Dalia STOIAN** — Engineer & President, EFdeN
- **Ionuț LUPU** — CEO, TODOME
- **Bogdan ILIESCU** — Commercial Director, NUSCO
- **Bogdan BUJNITĂ** — Marketing Manager, SolaX Power
- **Daniel HOPU** — Training Specialist, Stanley Black & Decker and Dewalt
- **Mihaela ICHIM** — Regional Marketing Manager Europe, Armstrong Fluid Technology

The online effort included targeted social media ads, search and display campaigns, and organic growth strategies that together generated tens of millions of impressions and sparked thousands of direct inquiries from interested visitors and companies. The event's website and mobile app provided exhibitors with continuous visibility, while SEO-rich content and newsletters kept audiences engaged throughout.

This mixed approach ensured ENERGY EXPO® was not just seen — it was experienced, talked about, and remembered across platforms, cities, and industries, firmly positioning the event as the most important energy exhibition fair in S-E Europe.

## Online Exposure

**ENERGY EXPO® 2025's online presence was an important part of its promotional strategy, aiming to maximize visibility and engagement across digital platforms.** Through a blend of paid advertising, organic growth methods, SEO optimization, and app integration, the campaign ensured ENERGY EXPO® remained highly visible and relevant to its diverse audiences.

**Paid digital campaigns were launched on various platforms, including Facebook, Instagram, LinkedIn, TikTok, Google Display, Search, and YouTube, each targeting specific audience segments.** These campaigns were optimized for maximum reach and interaction, **generating over 20 million impressions.** Click-through rates and engagement metrics confirmed the campaign's success, with thousands of targeted leads directed to the ENERGY EXPO® website.

**The website welcomed over 43.000 unique visitors** during the campaign, with an **average session duration of 1 minute and 48 seconds**, indicating strong content relevance and user engagement. Each exhibitor had a dedicated digital profile on the website as well as on the ENERGY EXPO® mobile app, with service descriptions and contact links, ensuring continuous visibility before, during, and after the event. Exhibitors also benefited from advertorials published on energymagazine.ro, which included backlinks to their websites and branded content.

**In terms of long-term discoverability, ENERGY EXPO® collaborated with over 90 partners who published at least 500 online articles, press releases, and interviews.** **These SEO-rich materials generated over 133.000 backlinks** to energyexpo.ro, significantly boosting organic traffic and the website's authority. A partial list of these media appearances — including online articles, print features, and campaign placements — is provided in [Appendix 1](#), attached to this report.

Email marketing was another important digital channel, with engaging **newsletters sent to multiple databases, with over 19.000 contacts combined**, covering industry professionals and the general public. These newsletters featured curated content, event updates, and tailored invitations, which helped maintain consistent engagement before and during the event.

**The ENERGY EXPO® mobile app** served as a digital guide for visitors and exhibitors. **With more than 7.500 downloads, and ranking #7 in the App Store's Business category and #58 on Google Play**, the app enabled users to participate and vote in competitions, generate and capture leads, connect with exhibitors, and access the full conference schedule and real-time updates.

## Offline Exposure

**While ENERGY EXPO® 2025 placed a strong emphasis on digital campaigns, offline exposure played an equally strategic role in expanding reach and building real-world presence across multiple audiences.** Designed to complement the online efforts, the offline campaign focused on national visibility, city-wide branding, in-person interaction, and creative, eco-conscious advertising — bringing ENERGY EXPO® into high-traffic public spaces and targeted media environments.

**A key part of the offline strategy was the media partnership with Antena 3 CNN,** Romania's most-watched news network. Over a three-month period, ENERGY EXPO® was featured in more than **300 TV spots**, including promos, interviews, live event coverage, and news features — reaching **an estimated cumulative audience of 17 million viewers**. On-site, **the dedicated Antena 3 CNN TV studio** offered exhibitors, partners, and speakers the opportunity to share their message, showcase their innovations, and amplify their visibility to a nationwide audience, acting like a bridge between ENERGY EXPO® and viewers at home.

**ENERGY EXPO® also invested in digital out-of-home (DOOH) campaigns across 22 strategic locations in Bucharest, including key intersections and metro stations.** These placements ran on a continuous 10-minute loop for one month before the event, resulting in an **estimated reach of over 550,000 impressions**. DOOH efforts were not only aimed at increasing general awareness of the event, but also at promoting two of the special projects — the #LOOPChallenge and the Treasure Hunt.

To further emphasize sustainability and innovation, **the event launched a reverse graffiti campaign across 1.6 km of high-traffic sidewalks in Bucharest.** Using clean water sprayed through custom stencils, this eco-friendly technique delivered visual messages promoting ENERGY EXPO® in locations such as **metro entrances, public squares, and pedestrian hubs**. It was a creative way to generate awareness while staying true to the event's environmental values.

**As part of the broader CSR initiative supporting the Plush Endless Column, a guerrilla campaign was launched by placing modular sections of the plush endless column at visible locations across Bucharest in the weeks leading up to the event — including Destiny Park, ParkLake Shopping Center, PPC Romania Headquarters, Cubic Center, and the Nu Mai Port event.** By donating a plush toy in the modular sections, visitors were able to gain free access to ENERGY EXPO®. The response to this campaign exceeded all the expectations and **more than 18,200 toys have been collected**, making the campaign both a visibility success and a powerful community action.

**Another important offline visibility channel was Casa Magazin,** Romania's top-rated construction and interior design program. ENERGY EXPO® was featured weekly for one month before and after the event, with dedicated promos, resulting in **an estimated cumulative reach of over 5.7 million views**.

In addition to Romanian exposure, **ENERGY EXPO® 2025 extended its offline footprint internationally. The team was present at major European industry events**, including Intersolar (Germany) and Solar Energy Expo (Poland) — allowing ENERGY EXPO® to connect with international exhibitors, partners, and sponsors.

**Notably, Energy Magazine — the official publication of ENERGY EXPO® — was one of only two magazines invited to exhibit with a dedicated booth at Intersolar 2025.** This recognition was a major milestone, offering **direct engagement with over 3.000 industry professionals** and positioning the magazine — and by extension, ENERGY EXPO® — as a regional leader. A special dual-purpose edition of the magazine (20.000 printed copies) was created for both Intersolar and ENERGY EXPO®, featuring premium advertorials and visibility for the ENERGY EXPO® exhibitors and affiliates.

Together, these offline efforts did not just support the digital campaign — they brought it to life. ENERGY EXPO® 2025 was not just seen, it was experienced across streets, screens, and stages. This layered approach made sure the event stayed visible, shareable, and memorable — long before, during, and after the doors opened.

## VI. Next Steps

ENERGY EXPO® 2025 marked a clear step forward — bigger, better, and more impactful than the first edition. With a growing community behind us, this year offered us the space to test new ideas, explore more complex formats, and better understand what resonates with both exhibitors and visitors. **As we continue to differentiate ENERGY EXPO® from traditional exhibitions by bringing fresh formats and bolder concepts to the table, experimentation remains essential — and so does learning from it.**

After two editions, we have a clearer sense of what works and what needs refining. Thanks to the detailed feedback from exhibitors, partners, and attendees, we are already working on a set of improvements to deliver an even better and valuable experience for 2026.

### Industry Focus & Target Markets

While the 2025 edition reflected key energy trends — particularly in solar, EPC, and energy storage — it also revealed the need to widen our industry lens. These segments remain vital as Romania continues its large-scale transition to renewables, but other areas are gaining momentum and deserve more space in 2026. **A greater focus will be placed on:**

- Green Hydrogen & Hydrogen Infrastructure
- Decentralized Energy Systems & Prosumer Models
- Grid Automation & Smart Energy Management
- Carbon Capture & Bioenergy Solutions
- Clean Industrial Heat & Electrification Technologies

This will help ensure ENERGY EXPO® remains aligned with the country's energy priorities — while also serving as a more complete platform for the industry's next developments and trends.

In terms of countries and regions, the **priority will remain on Turkey and Poland**, as both nations continue to demonstrate active investment in renewables, energy digitalization, and smart infrastructure — making them key players in the region. **In 2026, ENERGY EXPO® will expand its international focus to include:**

- **Nordic countries**, known for their global leadership in offshore wind, bioenergy, digital energy systems, and district heating — offering proven models and advanced solutions.
- **Southeast Asia**, with a stronger outreach to India, Vietnam, and China, will bring new opportunities in solar, storage, and clean-tech manufacturing.
- At the same time, **more Southeast European countries** will be engaged to strengthen ENERGY EXPO®'s role as a key regional connector for both public and private energy stakeholders.

## Exhibitor Journey & Visitor Access

While the overall organization of this year's edition unfolded smoothly, there is a clear opportunity to **enhance the exhibitor journey**, through the development of a **dedicated digital platform**. Designed to simplify and partially automate key processes, the new platform will offer **streamlined onboarding and registration, centralized logistics coordination, and easy profile and account management**. This will give exhibitors greater clarity, control, and visibility in the lead-up to and during the event. By reducing manual communication and standardizing key touchpoints, the platform aims to deliver a more consistent experience for all participants. The goal is to have it fully developed, tested, and operational well ahead of the 2026 edition.

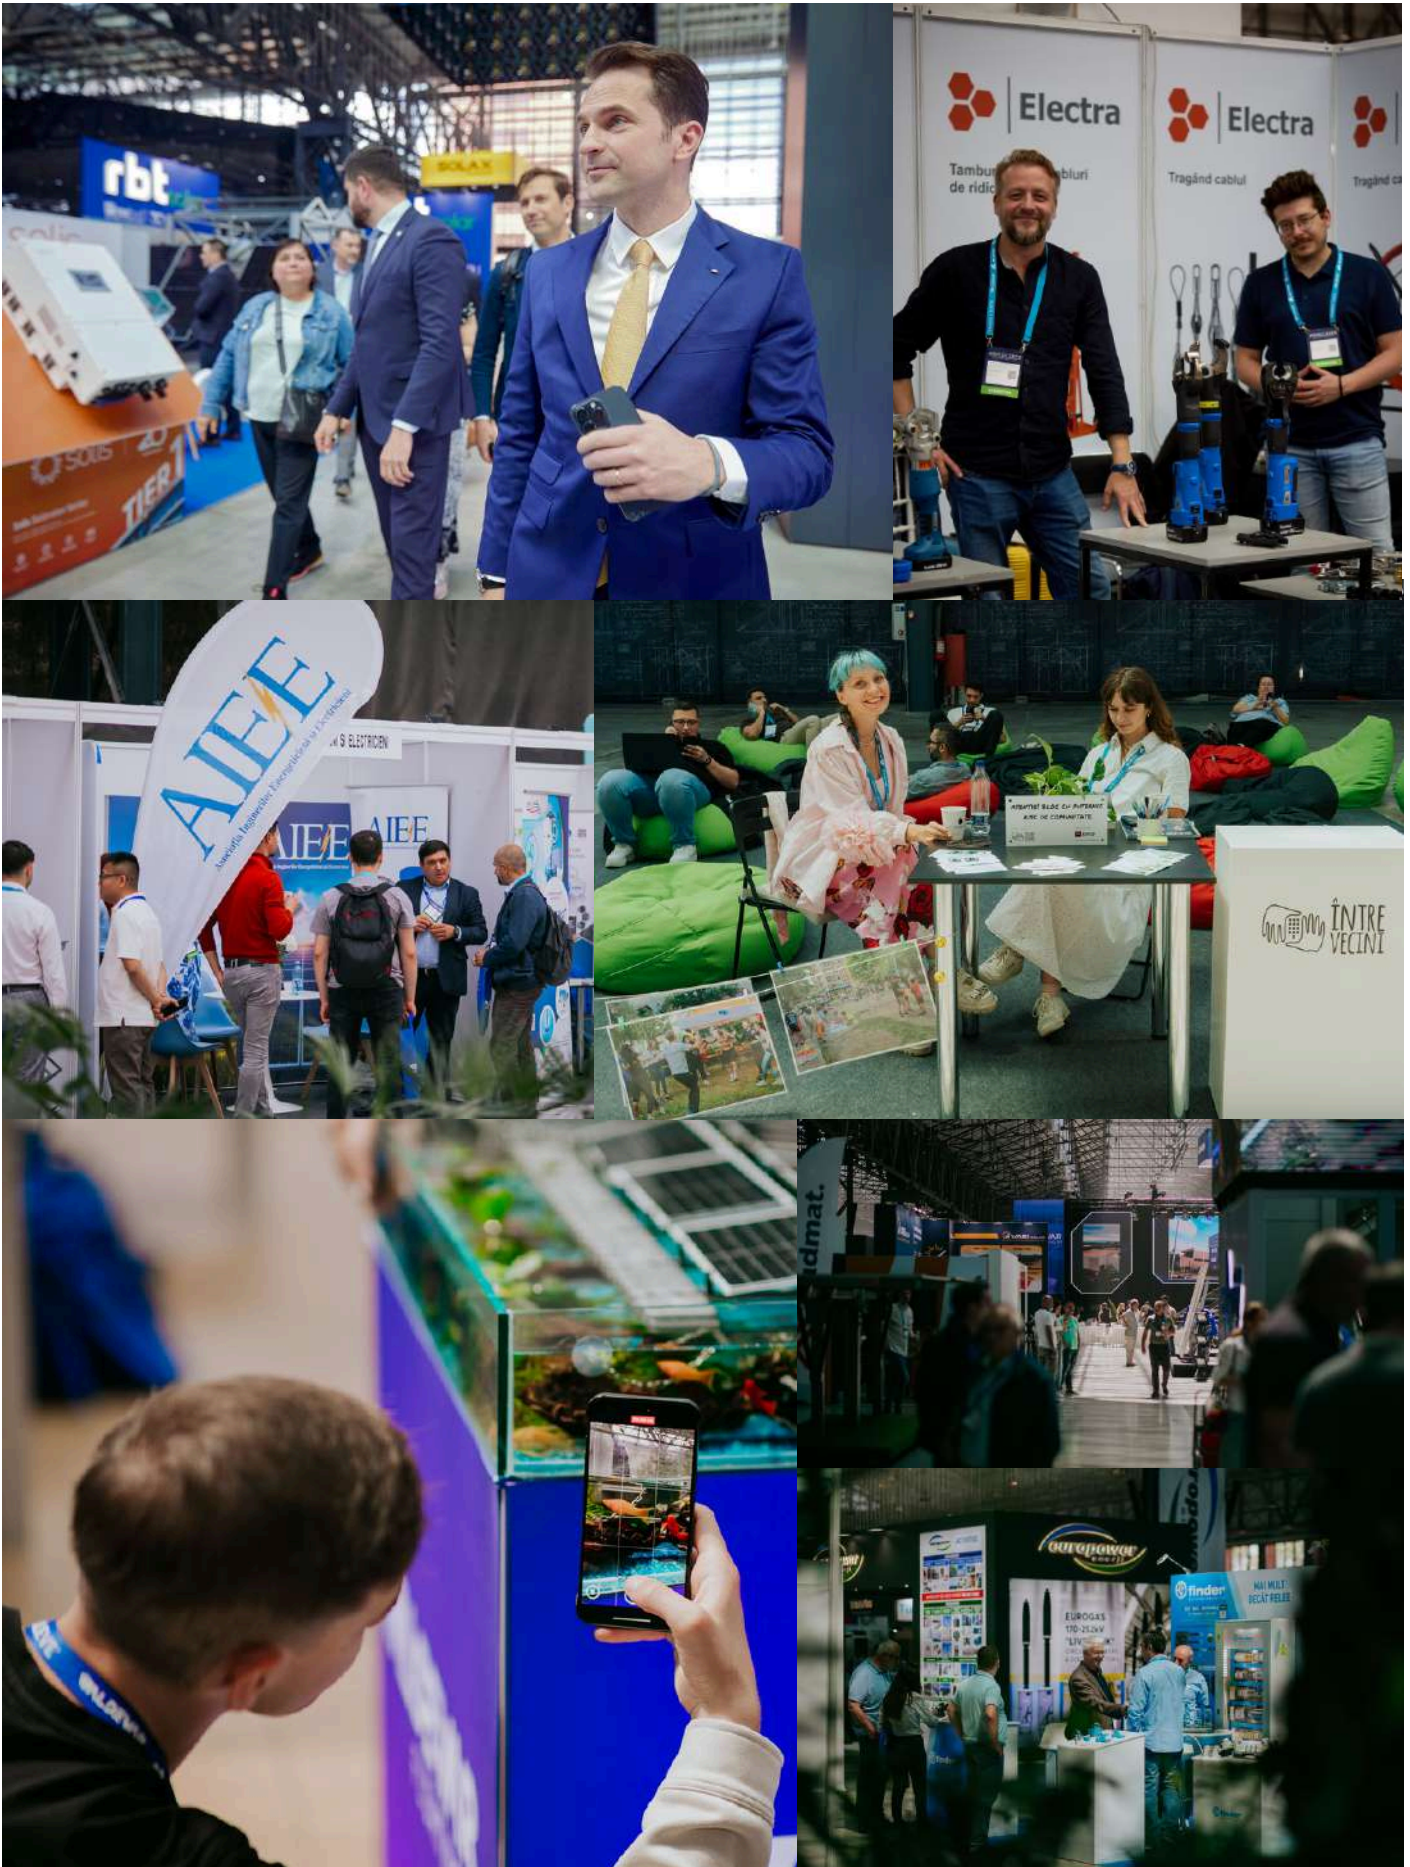

While the badge system worked during ENERGY EXPO® 2025, there were a few points of friction that stood out — especially around access control, scanning delays, and visitor flow during peak hours. For 2026, improvements are being planned to streamline the full registration and entry process. This includes **smarter visitor categorization, faster badge scanning, and better control at access points**. Increasing the number of push notifications and improving the indoor navigation system are also being considered, to help visitors find their way around and stay informed throughout the day. These practical upgrades are meant to improve the on-site experience, reduce wait times, and make networking more efficient and intuitive across the event space.

## Timing, Weather & Program Visibility

The warm weather during ENERGY EXPO® 2025 was less than ideal, but it proved fortunate in hindsight — just days later, Bucharest was hit by severe storms and widespread flooding. This highlights how unpredictable local weather has become. While such risks can never be entirely eliminated, **moving the event to a cooler and more “stable” period** is under consideration for 2026. The aim is to ensure a more comfortable experience for both exhibitors and visitors.

Another key takeaway from this edition concerns the conference schedule and the way it was communicated. The agenda was released later than initially planned, and not all attendees had access to the ENERGY EXPO® mobile app — where real-time updates and reminders were shared. As a result, some sessions saw lower-than-expected attendance, and a number of panels did not receive the visibility or audience they deserved. Nonetheless, live streaming every conference proved to be a very good decision, with strong engagement across all social media channels. To address these issues for 2026, **the full conference schedule will be released earlier, and on-site visibility will be improved**. Efforts will be increased to encourage pre-event app downloads, and we hope that these improvements will help ensure a smoother navigation and better engagement for all conferences and panels.

Overall, ENERGY EXPO® 2025 marked a turning point — not just in scale, but in insights. The lessons learned are now being put in action, with one goal in mind — to create a smoother, smarter, and more rewarding experience for all in 2026.

# Appendices

## Appendix 1 — Partial Media Monitoring

| Title                                                                                                                                 | Link                                                                                                                                                                                                                                                                                                                                                        |
